

Sales Orders Credit Card Processing

SO-CCP™

SO-CCP for ACCPAC Pro Series™ and ACCPAC VisionPoint™ is the leading seamlessly integrated electronic payment interface for ACCPAC® source products. Supporting both credit cards and debit cards, SO-CCP links with IC Verify® and is designed for wholesalers, manufacturers, or any company with MOTO (Mail Order Telephone Order) operations that has a need to process credit cards for electronic direct deposit of funds.

Benefits

- ✓ **Saves Time** – SO-CCP is directly integrated into SO Entry. Eliminates double entry into a standalone credit card machine.
- ✓ **Eliminates Errors** – removes the risk of error (undercharging or overcharging a customer credit card) due to double entry. For example, A \$100.00 sale entered in order entry when re-entered in the credit card machine is entered erroneously as \$10.00 by the clerk and the customer credit card is charged \$10.00 instead of \$100.00. This company has just potentially lost \$90.00 on the sale.
- ✓ **Improves Profits** – Reduced merchant fees, and charge-backs, with a lowered cost of doing business and improved efficiency, increases profits potentially saving hundreds or thousands of dollars per year. **NOW Available** (optional) – **Security Add-on module supports Address Verification(AVS) and Security Code Check(CVV)**

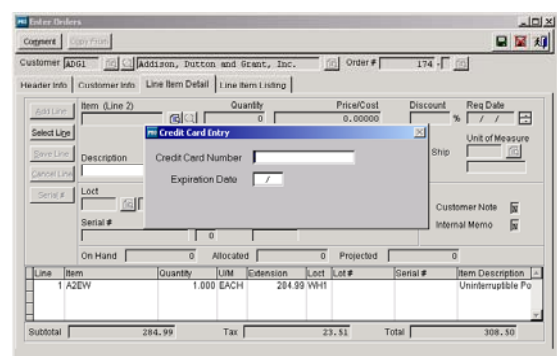

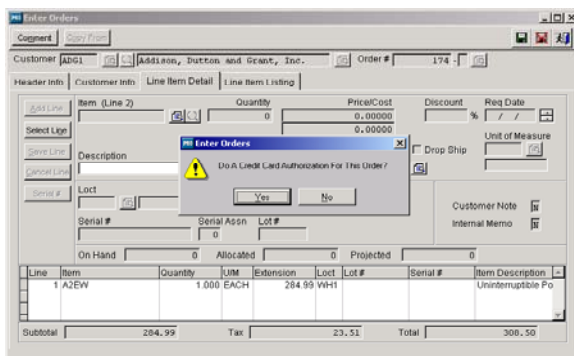

Payment Types Supported

Credit cards: Visa®, MasterCard®, American Express®, Discover Card®, Diners Club®, and JCB®
 Visa Commercial cards and purchasing cards
 MasterCard business cards, corporate purchasing cards and corporate fleet cards

How does it Work

Requires: SM, OF, and IC Verify - Supports Pro Series® SBE/EE

1. Upon saving of the Sales Order the operator receives a prompt to “Do a credit card authorization for this order”. If the operator chooses to do an authorization - the credit card number and expiration date is prompted for.
2. A pre-authorization request is sent electronically to the credit card processor via IC Verify. The processor will return an authorization number for a valid credit card or a decline message accordingly.
3. At shipping, the pre-authorized sales orders are prepared for auto or transactional settlement in IC Verify.
